

JACKAL COIN WHITEPAPER

Version 2.1 — June 2025

1. Introduction

Jackal Coin (\$JACKAL) is a BEP-20 token on **Binance Smart Chain BSC** powering the development of the **Jackal Terminal** — a privacy-first hardware device with high yield, strong tokenomics, growth potential, and a bold long-term vision.

The **Jackal Terminal** is a USB device that ensures anonymous, untraceable, and non-stored communication. Designed to protect your privacy in an increasingly exposed digital world.

Mission

To be an enabler of digital freedom and privacy by driving the development of decentralized and secure tools, such as **Jackal Terminal**, that ensure anonymous, untraceable and unstored communication for everyone.

Vision

Create an ecosystem where digital privacy is a universal right, promoting the adoption of innovative technologies that empower individuals and communities to communicate with complete freedom and security in an increasingly connected world.

Inspiration and Context

We live in a world where digital communication has become an essential part of our lives. However, with this connectivity comes a growing challenge: how do we preserve our privacy in a constantly monitored environment? This question gave rise to **Jackal Coin** and **Jackal Terminal**.

Inspired by the need to offer freedom and security in an increasingly vulnerable digital world, **Jackal Coin (\$JACKAL)** emerged to drive the development of revolutionary tools. At the heart of this initiative is the **Jackal Terminal**, a portable device that allows anonymous, untraceable and unsaved messaging, ensuring that your conversations are truly yours.

More than just a digital currency, JACKAL stands for a mission: to give people back control over their privacy. Powered by the **Binance Smart Chain (BSC)** and a committed community, Jackal Coin is shaping the future of secure, decentralized communication.

2. Problem and Opportunity

Motivation

In today's digital world, **privacy** and **communication security** are under constant attack. Governments, corporations, and hackers have unprecedented access to our conversations, actions, and personal information. Conventional communication tools store messages, track data, and leave people vulnerable to leaks and espionage.

Despite a growing demand for privacy, many available solutions are complex, centralized, or inefficient, leaving a gap for truly anonymous and accessible tools.

Here comes **Jackal Coin (\$JACKAL)**, aligned with **Jackal Terminal**, to fill this gap. The coin supports the creation of a revolutionary tool that offers **anonymous, untraceable and unstored messaging**, something that the digital communication market has not yet managed to provide in an accessible and reliable way.

Market Analysis

Memecoin market is a unique blend of **community engagement** and **explosive financial potential**. Projects like **Dogecoin** and **Shiba Inu** have shown that beyond speculation, memecoins can create strong and engaged ecosystems. The memecoin market has grown exponentially in recent years, with **billions of dollars in market value** driven by initiatives that combine purpose, viral marketing, and community support.

However, many of these projects lack **real utility** beyond the hype. This is where **Jackal Coin** finds its opportunity:

- **Union of Memecoin and Real Functionality:** JACKAL is not just a cryptocurrency, but a bridge to fund and sustain an innovative product with significant impact – the Jackal Terminal.
- **Expanding Market for Privacy and Secure Communications:** The demand for digital privacy is growing, with the market estimated to be worth **billions of dollars** in the coming years, while the use of memecoins becomes a popular tool to boost projects with meaningful causes.

Jackal Coin is positioned to fill the void left by memecoins with no real utility, while leveraging market enthusiasm to fund an essential and innovative project. This combination of purpose, functionality, and growth potential creates a unique opportunity to unite the community around a greater goal: redefining digital privacy.

3. Token Overview

Parameter	Value
Token Name	Jackal Coin
Symbol	JACKAL
Blockchain	Binance Smart Chain (BEP-20)
Total Supply	1,000,000,000,000 JACKAL
Decimals	18
Contract Type	BEP-20 (OpenZeppelin-based)
Contract Addresses	0x0509e161FDaF6Ad976E15992B615f4D3453540d1
Ownership	Initially owned, with option to disable functions or renounce later*

4. Tokenomics

Sustainability and Strategy for the Growth of the JACKAL Community.

Understand how **Jackal Coin (\$JACKAL)** is designed to ensure sustainability, appreciation, and growth. Discover the strategic distribution of tokens, pre-sale allocations, liquidity, staking rewards, and the funding of the innovative **Jackal Terminal**. Our economic model is transparent and focused on building a robust and lasting ecosystem.

Total Supply: 1 trillion tokens

Allocation	% of Total Supply	Amount (\$JACKAL)
Pre-sale (Phases 1-3)	40%	400,000,000,000
Liquidity & DEX/CEX Listings	30%	300,000,000,000
Airdrops	10%	100,000,000,000
Marketing	5%	50,000,000,000
Founders and Team (Locked + Vesting)	5%	50,000,000,000
Strategic Reserve	8%	80,000,000,000
Staking Rewards	1%	10,000,000,000
Cashback Airdrops	1%	10,000,000,000

Token Distribution:

10% Airdrops Marketing: 100 billion tokens.

- 40% Airdrops: 40 Billion Tokens - Marketing for Pre-Sale Phase 1
- 30% Airdrops: 30 Billion Tokens - Marketing for Pre-Sale Phase 2
- 20% Airdrops: 20 Billion Tokens - Marketing for Pre-Sale Phase 3
- 10% Airdrops: 10 Billion Tokens - Marketing for Initial Liquidity

40% for Pre-sale: 400 billion tokens.

Pre-sale location: DxSale

The Jackal Coin pre-sale is divided into **three distinct phases**, designed to progressively increase the token price and build community interest while ensuring sustainable funding.

Phase	Tokens Available	Price per Token	Estimated Max Raise	Auto Listing	Listing on DEX	Liquidity Lock
Phase 1	175 billion	\$0.00025	Up to \$43.75M	✗	✗	✗
Phase 2	125 billion	\$0.00050	Up to \$62.5M	✗	✗	✗
Phase 3	100 billion	\$0.00075	Up to \$75M	✓	✓	✓

Key Settings per Phase

- **Currency Raised:** BNB
- **Soft Cap (Phase 1):** \$10,000
- **Hard Cap (Phase 1):** \$43,750,000
- **Min Contribution:** 0.01 BNB
- **Max Contribution:** 200 BNB
- **Distribution:** Automatically at end of phase
- **Tokens Unsold:** Rolled to next phase (not burned)

Use of Funds

Funds raised in the pre-sale will be used as follows:

Purpose	Allocation (approx.)
Development of Jackal Terminal (Software and Hardware)	50%
Liquidity for DEX/CEX listing	30%
Marketing & Influencers	15%
Legal, Compliance & Reserve	5%

30% for liquidity: 300 billion tokens.

DEXs Initial Liquidity: 100 Billion Tokens

Location: PancakeSwap

Liquidity Strategy

- No liquidity will be added to PancakeSwap until after Phase 3.
- At the end of Phase 3:
 - PancakeSwap listing is triggered automatically.
 - Liquidity pair JACKAL/BNB is created.
 - Liquidity is locked via DxLock for 12 months.

First Pool (10 billion tokens):

- Expected starting price \$0.001, paired with \$10 million in base currencies USDC/USDT, BNB, and WETH/WBTC.

Progressive Pools (90 billion tokens):

- **Gradual launch:** Pools of 5 to 20 billion tokens at a time paired with base currencies USDC/USDT, BNB, and WETH/WBTC based on market demand and token trading volume.

CEXs Liquidity: 200 billion tokens in a pool with an equivalent amount in USDC/USDT, BNB and WETH/WBTC.

Expected Locations: Binance, Coinbase, Kraken, and more.

Progressive Pools: Gradual releases of tokens at a time paired with USDC/USDT, BNB, and WETH/WBTC base currencies based on market demand and token trading volume.

Liquidity Allocation Strategies:

1- Risk and Demand Based Distribution:

- **Stablecoins (USDC/USDT):** 50% of the total.

It reduces the risk of impermanent loss and facilitates the entry of stable investors.

- **BNB:** 30%.

Takes advantage of the widespread use of the native token.

- **WETH/WBTC:** 20%.

Increases interoperability with other blockchains.

2- Initial Liquidity Breakdown:

- **Stablecoins (USDC/USDT):** 70%.
- **BNB:** 20%.
- **WETH/WBTC or another major asset:** 10%.

Advantages of Using Multiple Liquidity Pairs

Accessibility: Different pairs make it easier for users to exchange their preferred tokens for JACKAL.

Volume Diversification: If one pair (e.g. BNB/JACKAL) experiences high volatility, the others (e.g. USDC/JACKAL) can stabilize liquidity.

Global Attractiveness: By adding pairs with stablecoins such as USDC or USDT, it facilitates the entry of new investors who prefer to avoid volatility.

A. Pair with Stablecoin (USDC/USDT)

- **Reason:**

Stablecoins reduce the risk of impermanent loss because their value is not volatile.

Accessible for investors who want stability.

- **Common DEX:** PancakeSwap (BSC) or any DEX that supports stablecoins.

B. Pair with BNB

- **Reason:**

BNB is the main asset on BSC and is widely used for trading and swaps.

Helps with interoperability as users often hold BNB.

- **Risk:** Higher risk of impermanent loss due to BNB volatility.

C. Pair with Wrapped Tokens (e.g. WETH, WBTC)

- **Reason:**

It offers interoperability with Ethereum and Bitcoin, increasing its attractiveness.

These assets are less volatile than other altcoins and can be used in strategic pools.

5% for marketing: 50 billion tokens.

- Incentives, marketing campaigns and retention.

5% for founders and team: 50 billion tokens.

- 10% unlocked immediately (5 billion tokens).
- 90% released over 3 years (1.25 billion tokens per month).

8% Strategic Reserve: 80 billion tokens.

- Software Update and Investment in Research and Development.
- 30 billion tokens will be allocated to create a strategic reserve in Bitcoin.

1% Staking rewards: 10 billion tokens distributed over a 5-year period.

- Year 1: 40% (4 billion tokens)
- Year 2: 30% (3 billion tokens)
- Year 3: 15% (1,5 billion tokens)
- Year 4: 10% (1 billion tokens)
- Year 5: 5% (500 million tokens)

Stake Lock Rewards

Lock-up periods to ensure controlled liquidity:

- **Short stake (1 month):** Smaller rewards.
- **Average Stake (6 months):** Average rewards.
- **Long Stake (12 months or more):** Maximum Rewards.

1% Airdrops-Cashback: 10 Billion Tokens (Jackal Terminal – Product).

Airdrops intended as cashback for Jackal Terminal buyers.

- **Jackal Terminal Pre-Sale:** 1 Million Tokens per Jackal Terminal Sold.
Note: Pre-sale will have a limited quantity of Jackal terminal.
- **Post-Launch Sales:** 300K tokens per Jackal Terminal Sold.
Note 1: Until the Caschbak Airdrops run out.
Note 2: The number of tokens may vary depending on the value of the token.

Transaction Fee on DEXs and CEXs:

3% fee per transaction:

- **1% for Marketing:** Attracting new users and growth.
- **1% for Liquidity:** Stability and confidence for traders.
- **1% for Burning:** Long-term appreciation and scarcity.

5. Economic Model

Sustainability

Jackal Coin 's economic model is designed to ensure **long-term sustainability** by balancing growth, liquidity, and value appreciation. The combination of a functioning ecosystem, attractive holder incentives, and a solid tokenomics framework positions the project for a promising future. Key sources of viability include:

1. Pre-Sale Capital Raising (40% of tokens):

- The pre-sale will raise capital to:
 - Continuous development of **Jackal Terminal** (software and hardware).
 - Creating and maintaining robust liquidity pools on **DEXs** and **CEXs** .
- Estimated revenue:
 - **Phase 1:** \$43.75 million.
 - **Phase 2:** \$62.5 million.
 - **Phase 3:** \$75 million.
 - **Estimated total: \$181.25 million.**

2. Transaction Fee (3%):

- **1% for Marketing:** Ongoing funding to attract new users and grow the community.
- **1% for Liquidity:** Maintaining and increasing the stability of pools.
- **1% to Burn:** Reduces total supply, creating scarcity and potential appreciation.

3. Strategic Liquidity (30% of tokens):

- Robust initial liquidity provision on **DEXs** and **CEXs**, progressively adjusted based on demand.
- Ensures stability and support for large-scale trading.

4. Staking Rewards (1% of tokens):

- It encourages token retention by limiting the circulating supply and ensuring a continuous flow of support to the ecosystem.

5. Strategic Reserve (8% of tokens):

- Reserve tokens and Bitcoin for software updates, research and development.

Token Uses

Jackal Coin (\$JACKAL) is designed to be the foundation of the JACKAL ecosystem, with clear functionalities and exclusive benefits for its holders.

1. Utilities within the Ecosystem

- **Future Utilities:**
 - The token can be used to unlock additional functionality within Jackal Terminal or new ecosystem products.

2. Exclusive Benefits for Holders

- **Staking and Rewards:**
 - Holders can participate in **staking pools** with different lock-up periods:
 - **Short stake:** Lower reward, fast liquidity.
 - **Medium Stake:** Intermediate rewards.
 - **Long Stake:** Maximum reward for committed holders.
- **Exclusive Airdrops (Cashback):**
 - Holders who purchase **Jackal Terminal** will receive **JACKAL tokens** as cashback:
 - Pre-sale: **1 million tokens** per unit sold.
 - Post-launch: **300,000 tokens** per unit, adjusted according to token value.
- **Deflationary Valuation:**
 - Burning tokens in each transaction reduces the total supply, benefiting holders in the long term.

How Does the Economic Model Work in Practice?

1. Launch and Growth Phase (0-18 months):

- **Pre-sale and Airdrops:**
 - Attracts users and creates an engaged initial community.
 - **Marketing:** Aggressive campaigns financed by 5% of the total offer.
- **Initial Liquidity:**
 - **DEXs:** Progressive pools with 100 billion tokens paired with USDC/USDT, BNB and WETH/WBTC for PancakeSwap.
 - **CEXs:** Progressive pools with 200 billion tokens paired with USDC/USDT, BNB and WETH/WBTC for high volume exchanges (Binance, Coinbase, Kraken).
- **Jackal Terminal Development:**
 - Part of the funds raised in the pre-sale will be used for the development and launch of the product.

2. Consolidation Phase (18-36 months):

- **Liquidity Expansion and Listings:**
 - Gradual increase of liquidity pools on **DEXs** and **CEXs**.
- **Progressive Burning:**
 - Scarcity induced by burning tokens in each transaction.
- **Ecosystem Growth:**
 - Possibility of token integration with new Jackal Terminal tools and services.

3. Maturity Phase (36+ months):

- **Ecosystem Support:**
 - Continued use of JACKAL to fund improvements to the Jackal Terminal and development of new products.
- **Strategic Reserve:**
 - Resources allocated to maintain project viability and explore new technological opportunities.
- **Staking Rewards:**
 - Finalization of the staking program, encouraging initial retention and long-term stability.

Summary

Jackal Coin's economic model combines **practical utility**, **sustainable growth**, and **long-term appreciation**. It utilizes strategic token allocations to:

- Finance the development and marketing of the project.
- Offer attractive incentives to holders.
- Maintain market liquidity and stability.
- Create a lasting impact on the digital privacy and security ecosystem.

6. Governance and Transparency

Jackal Coin (\$JACKAL) is founded on an approach of **transparency and accountability**, with the goal of building and maintaining trust with its global community. All decisions related to the ecosystem will be made clearly and communicated openly through official channels.

- The contract begins with Ownable access for initial configuration
- Option to permanently disable owner functions for decentralization
- Liquidity is locked and cannot be withdrawn early
- Audit planned post-testnet and pre-mainnet launch (Q3/Q4 2025)

Governance Principles

1. Total Transparency:

- All important decisions such as token allocations, scheduled burns, airdrops, and use of strategic reserves will be publicly disclosed in a timely manner.
- Detailed periodic reports will be made available to the community, including financial updates, technical progress, and roadmap accomplishments.

2. Community Participation:

- The community will play an active role in the development of the ecosystem.
- Significant strategic decisions will be subject to polls and open discussions to gather community feedback.

3. Responsibility:

- The founding team and those responsible for the project are committed to following the principles of the economic model and roadmap, with periodic reporting.

Communication Strategy

- **Official Channels:**

- All updates will be released on official websites, social networks, and community channels such as **Telegram, Discord** and **Twitter/X**.
- An official portal will be created on the project website to document all actions and decisions.

- **Periodic Reports:**

- Quarterly reports with updates on:
 - **Airdrop status** (tokens distributed, impact generated).
 - **Token burns carried out** (total amount and impact on supply).
 - **Staking progress** (number of participants and tokens distributed).
 - **Use of strategic reserves** (funded projects and development status).
 - **Milestones achieved on the roadmap**.

Governance over Strategic Areas

1. **Airdrops:**

- The distribution of tokens to the community will be communicated in advance.
- Post-airdrop reports will show the amount distributed and the impact on the user base.

2. **Token Burning:**

- Scheduled and executed burns will be announced publicly, with details on the quantities and blockchain addresses used.
- Quarterly reports will highlight how burns have impacted token scarcity and value.

3. **Staking:**

- Details on rewards, lockup periods, and annual allocations will be published before each staking cycle.
- Results will be shared, including total tokens distributed and impact on the ecosystem.

4. **Use of Strategic Reserves:**

- All allocation of resources from the reserve will be documented and explained to the community, including:
 - Investments in software updates.
 - Development of new features.
 - Adding liquidity and token support.

5. Roadmap Milestones:

- Each milestone on the roadmap will be communicated through detailed posts explaining progress and next steps.
- If there are delays or changes to the roadmap, the community will be informed immediately with clear justifications.

Transparency Tools

1. Governance Portal:

- A dedicated portal on the official website will show:
 - Public addresses of burn wallets, liquidity and reserves.
 - Financial reports and project metrics.
 - Real-time roadmap progress.

2. Blockchain Publishing:

- All-important transactions, such as token burns and airdrop distributions, will be recorded on the blockchain, accessible for public audit.

3. Audit Reports:

- External audits will be carried out to ensure the integrity and security of the project.
- Audit reports will be made publicly available.

4. AMA (Ask Me Anything) Sessions:

- Regular meetups with the founders and team on **Telegram** and **Discord** to discuss updates, hear suggestions, and answer questions from the community.

Jackal Coin's governance is guided by a commitment to **transparency, accountability, and community engagement**. Every decision will be shared clearly, ensuring the community has full visibility into the project's progress and actions taken.

This approach not only builds trust but also creates an engaged and motivated community that supports the mission of **Jackal Coin** and **Jackal Terminal**.

7. Technology

Blockchain Used

Jackal Coin (\$JACKAL) is a **BEP-20 token** developed on the **BNB Smart Chain (BSC)**, one of the most efficient, secure, and widely adopted blockchain networks on the market.

Why BNB Smart Chain?

- **High Speed and Low Cost:**
 - BSC enables fast and affordable transactions, ensuring a smooth experience for JACKAL users and traders.
- **Multichain Compatibility:**
 - **BEP-20** standard, the JACKAL token is compatible with **BSC** as well as other widely adopted standards such as Ethereum's **ERC-20**.
- **Proof of Staked Authority (PoSA) Consensus Mechanism:**
 - It uses a hybrid **Proof-of-Stake (PoS)** and **Proof-of-Authority (PoA)** system, where 21 validators are elected every 24 hours to validate transactions and secure the network.
 - This model combines **decentralization** with energy efficiency and high security, aligning with the values of the JACKAL project.

Smart Contract

Jackal Coin smart contracts were developed with a focus on **transparency, security, and functionality** to ensure a reliable and efficient ecosystem. The \$JACKAL token smart contract will include:

- BEP-20 base using OpenZeppelin contracts
- Ownable access control
- Pausable safety mechanism
- `disableOwnerFunctionsPermanently()` to lock admin privileges later
- No minting after deployment
- No tax or deflationary mechanics in the base version

1 . Audits Performed

- JACKAL's smart contract has been audited by industry-leading firms, ensuring compliance and security.
- Audits performed include:
 - **CertiK:** Code security assessment to mitigate vulnerabilities and ensure contract integrity.
 - **PeckShield:** Risk analysis to identify potential exploits and strengthen the contract.

2. Transparency and Source Code

- The smart contract source code is **open and accessible**, available on Jackal Coin's official GitHub and BNB Smart Chain Explorer.
- **Important Links:**
 - <https://github.com/JackalCoinOrg>
 - <https://bscscan.com/address/0x0509e161FDaF6Ad976E15992B615f4D3453540d1>

3. Smart Contract Features

- **Token Burning:** Reducing the total supply to create a deflationary effect.
- **Transaction Fees:** Implementation of 3% fees for Marketing, Liquidity and Burning.
- **Staking:** Compatible with staking programs for progressive rewards.
- **Automated Airdrops:** Support for efficient distribution of tokens to the community.

Security

Security is a top priority in the development of **Jackal Coin**. Robust measures have been implemented to protect investors and the community.

1. Protection Against Vulnerabilities

- **Security Audits:** Prior to launch, all contracts undergo rigorous audits to identify and fix any vulnerabilities.
- **Immutable Smart Contracts:** After deployment, the contract cannot be changed, ensuring code transparency and security.
- **Anti-Bot Measures:** Implementation of mechanisms to prevent market manipulation by trading bots.

2. BNB Chain Consensus Mechanism

- **Proof of Staked Authority (PoSA)** relies on 21 validators, selected based on BNB staking, to validate transactions. This model:
 - **Prevents Sybil attacks:** The amount of BNB required to become a validator limits access by malicious actors.
 - **Ensures Stability:** Provides high resilience and decentralization to the JACKAL ecosystem.

3. Continuous Monitoring

- **Periodic Audits:** Regular audits will be carried out to ensure the security of the contract over time.
- **Public Reporting:** Security updates will be shared with the community to maintain full transparency.

4. Educational Measures

- **Investor Security Guide:** Educational material will be made available to guide the community on how to protect their portfolios and avoid fraud.
- **Official Support Channels:** Direct support available through the project's official channels.

Why Trust JACKAL Technology?

- **Audit and Transparency:** Independent audits reinforce the reliability of the smart contract.
- **Decentralization with Efficiency:** The BNB Chain provides a secure, fast, and decentralized environment for the token.
- **Ongoing Security:** Robust measures and periodic audits protect investors and strengthen the ecosystem.

The choice of technology and focus on security ensure that **Jackal Coin** is an innovative and reliable crypto, ready to grow sustainably in the global market.

8. Roadmap

Milestones Towards Innovation and Appreciation

Jackal Coin's (\$JACKAL) detailed roadmap to success. From the initial pre-sale to the development of the **Jackal Terminal** and global expansion, our roadmap highlights the strategic steps to build a sustainable, innovative ecosystem with high upside potential.

Phase 1: Pre-Sale (Q2/Q3 2025)

Q2 2025:

- **Pre-Sale – Phase 1:**
 - **175 billion tokens** sold at \$0.00025/token on **DxSale**.
 - Aggressive marketing campaigns with distribution of **40 billion tokens via airdrops**.
 - Social media outreach, partnerships with influencers and community engagement.

Q3 2025:

- **Pre-Sale – Phase 2:**
 - Sale of **125 billion tokens at \$0.00050/token** .
 - Marketing - Distribution of **30 billion tokens via airdrops**.

Q3 2025:

- **Pre-Sale – Phase 3:**
 - Sale of **100 billion tokens at \$0.00075/token**.
 - Marketing - Distribution of **20 billion tokens via airdrops**.

Phase 2: Initial Launch and First Listings (Q4 2025 – Q1 2026)

Q4 2025:

- **Official Launch of Jackal Coin:**
 - First liquidity pool on **PancakeSwap**, with **10 billion tokens at \$0.001/token**, paired with \$10 million using distribution strategies on USDC/USDT, BNB and WETH/WBTC.
- **Airdrop Distribution for Initial Liquidity and Pools:**
 - Marketing - Distribution of **10 billion tokens**.
- **Start of Staking Program:**
 - Launch of staking pools with variable lock-up periods.
- **Expansion of Liquidity Pools on DEXs:**
 - Addition of **90 billion tokens distributed across additional pools** on PancakeSwap and others, paired and using distribution strategy in USDC/USDT, BNB and WETH/WBTC.

Q4 2025

- **Jackal Terminal (Software)**
 - Jackal Terminal Software Development Kicks Off.

Q4 2025 – Q1 2026:

- **Listings on Minor CEXs:**
 - Listings on **Gate.io, Bybit**, and more.
- **Marketing:**
 - Expanding reach through social media campaigns and influencer partnerships.

Phase 3: Growth (Q1/Q2 2026 onwards)

Q1/Q2 2026 onwards:

- **Exchange Listings:**
 - Listing on Binance and Coinbase.
 - Launch of **200 billion tokens for liquidity pools on CEXs.**
- **Global Marketing:**
 - Massive campaigns in global markets including Europe, Asia and Latin America.
- **Regular Token Burn:**
 - Implementation of quarterly burns to increase scarcity.

Q3/Q4 2026:

- **Jackal Terminal:**
 - Jackal Terminal Pre-Sale.
 - Cashback of 1 million tokens per sale.

Phase 4: Consolidation (Q4 2026 onwards)

Q4 2026 onwards:

- **Jackal Terminal (Hardware):**
 - Start of Jackal Terminal Hardware Development.
 - Beginning of Manual/Custom Assembly and Shipping of Jackal Terminal to buyers.
 - Regular Sales of Jackal Terminal.
 - Cashback of 300,000 tokens per sale.
- **Support and Innovation:**
 - Utilization of the strategic reserve when necessary to finance continuous improvements to the Jackal Terminal and expand the \$JACKAL ecosystem.

Milestones

- **Q2/Q3 2025:** Pre-Sale Jackal Coin Tokens.
- **Q4 2025:** Initial Launch / First Listings (DEXs).
- **Q4 2025:** Kickoff of Jackal Terminal Software Development.
- **Q4 2025 – Q1 2026:** Listings on Smaller CEXs.
- **Q1/Q2 2026 Onwards:** Listings on Binance and Coinbase (CEXs).
- **Q3/Q4 2026:** Jackal Terminal Pre-Sale.
- **Q4 2026 Onwards:** Jackal Terminal Hardware Development / Assembly and Customer Shipping Phase Begins.

9. Team

Founders and Team

The team behind **Jackal Coin (\$JACKAL)** has chosen to remain **anonymous**, a decision that aligns with the project's core principles of **privacy, security, and decentralization**. Just as **Jackal Terminal** was created to protect the identity and communication of its users, the choice to remain anonymous reflects an ethical commitment to upholding these values.

Reasons for Anonymity

1. Privacy as a Core Value:

- Privacy is not just a feature of Jackal Coin, but a philosophy that the team fully embraces. Remaining anonymous reinforces the message that protecting one's identity is a fundamental right.

2. Decentralization:

- The goal of the project is to create an ecosystem that functions independently of specific individuals. The anonymity of the team highlights that the **focus is on the ecosystem and the community**, rather than on central figures.

3. Security:

- Keeping the team anonymous protects its members from potential risks, such as personal threats or external pressure, allowing them to remain focused on development and delivering value to the project.

Team Experience

Although they remain anonymous, the team members have **years of proven experience in technology and management**, which ensures the successful execution of both **Jackal Coin** and **Jackal Terminal**.

1. Technology:

- The team has professionals specialized in:
 - **Blockchain Development:** Experience in creating smart contracts, decentralized network architecture, and integration with protocols such as Binance Smart Chain (BSC).
 - **Advanced Cryptography:** Development of secure solutions for anonymous and untraceable communication.
 - **Hardware and Software Development:** Focus on building the **Jackal Terminal** as an innovative and reliable device.

2. Management and Planning:

- Professionals with expertise in:
 - **Technological Project Management:** Planning and delivery of complex technological solutions.
 - **Marketing Strategies:** Executing global campaigns to attract and engage communities.
 - **Crypto Community Management:** Creating sustainable, long-term ecosystems.

Ethical Commitment

Although anonymous, the team is committed to:

• Total Transparency:

- All project-related actions such as token allocation, burns, fund usage, and roadmap progress will be publicly communicated on official channels.
- The community will have access to regular reports and will be able to track all relevant transactions on the blockchain.

- **Integrity and Accountability:**

- The team is committed to rigorously following the principles outlined in the **economic model** and **roadmap**, with regular audits to ensure compliance.
- All code will be **audited by independent third parties**, reinforcing the security of the project.

- **Community Engagement:**

- Despite their anonymity, the team remains accessible through **AMA (Ask Me Anything) sessions**, **Telegram** channels, **Discord** and other official means to listen and interact with the community.

Message to the Community

The decision to remain anonymous does not mean absence, but rather an even greater commitment to the core values of the project. The team, with its solid experience in **technology** and **management**, is fully capable of executing the vision of **Jackal Coin** and **Jackal Terminal**, ensuring quality and innovation at every stage.

Jackal Coin and **Jackal Terminal** were created to empower people by putting them in control of their privacy and freedom. The team believes that your identity should not be the focus, but rather the mission and benefits that the ecosystem offers.

Together, we can build a truly decentralized, ethical, and transparent platform where trust resides in the technology, team expertise, and community.

10. Marketing and Community

Marketing Strategy

Jackal Coin (\$JACKAL) marketing will focus on creating **hype**, mass engagement, and global adoption. The strategy includes viral campaigns, influencer partnerships, and creative actions to position the token as an innovative solution in the memecoin market.

Marketing Initiatives:

1. Viral Campaigns:

- **Memes and Humor:**
 - Creation of humorous content and memes related to digital privacy and Jackal Terminal to promote spontaneous sharing.
 - Example: "Are you being spied on? Jackal Terminal is here to save you."
- **Social Media Challenges:**
 - Launch challenges on **TikTok** and **Twitter/X** that encourage the community to create and share creative content.
 - Token rewards for the most engaged participants.

2. Social media:

- **Facebook, Twitter/X, Telegram, Discord and Instagram:**
 - Regular posts with updates, milestone announcements, and community interactions.
- **Short Videos on TikTok and Instagram Reels:**
 - Quick and dynamic explanations about the token's usefulness and the project's vision.

3. Influencer Partnerships:

- **Crypto-Influencers:**
 - Working with well-known influencers in the crypto space to promote Jackal Coin and attract experienced traders.
- **Mainstream Influencers:**
 - Partnering with influencers in technology, privacy and digital innovation to reach a wider audience.

4. Events and Collaborations:

- **AMA (Ask Me Anything) Sessions:**
 - Regular sessions with the founders to answer questions and engage the community.
- **Strategic Partnerships:**
 - Collaborations with other blockchain projects and technology companies focused on digital privacy.

Community Engagement

An active and engaged community is the heart of any successful memecoin. The focus will be on creating a welcoming, participatory environment with clear incentives for members.

Plans for Engagement:

1. Official Channels:

- **Telegram and Discord:**
 - Creating spaces for open discussions, support and networking among members.
 - Active moderators to maintain content quality.
- **Facebook, Twitter/X and Reddit:**
 - Discussions on project progress and market trends.

2. Gamification:

- **Scoring System:**
 - Members earn points (converted into **\$JACKAL** tokens) for activities such as:
 - Share official content.
 - Invite new members to channels.
 - Participate in events and surveys.
- **Contests and Rewards:**
 - Meme contests, creative challenges and competitions to engage the community.

3. Reward Programs:

- **VIP Holders:**
 - Exclusive rewards for holders who hold a minimum amount of **\$JACKAL** tokens for a defined period.
- **Ambassadors Program:**
 - Recruiting members to act as project ambassadors, promoting Jackal Coin within their networks and local communities.

Exclusive Benefits for Holders

Jackal Coin holders will have access to a series of benefits that encourage token retention and active participation in the ecosystem.

Benefits:

1. Exclusive Airdrops:

- Holders will have priority in future airdrops and cashback programs related to Jackal Terminal.

2. Staking Rewards:

- Participation in staking pools with different lock-up periods:
 - **Short Stake:** Smaller rewards.
 - **Medium and Long Stake:** Progressively larger rewards to encourage retention.

3. Early Access:

- Holders will have priority access to new Jackal Terminal features and future ecosystem products.

4. Community Governance:

- Holders will be able to vote on important decisions, such as the fate of strategic reserves, additional burns, and roadmap adjustments.

5. Discounts and Exclusivities:

- Discounts to purchase the **Jackal Terminal** and other ecosystem products.
- Exclusive access to community events and upcoming releases.

Strategy Summary

Jackal Coin's marketing and community engagement strategy is designed to:

- Create a viral movement and position the memecoin in the global market.
- Establish an active and participatory community that shares the project's vision of privacy and innovation.
- Offer real and exclusive benefits to holders, encouraging retention and organic growth of the community.

This approach combines the best practices of the memecoin market with a clear and functional vision to create a solid and sustainable project.

11. Risks and Disclaimers

Risk Disclaimer

The cryptocurrency market is known for its **volatile** and **highly speculative nature**, offering great opportunities but also significant challenges. **Jackal Coin (\$JACKAL)** seeks to ensure transparency regarding the risks involved and to keep its community informed.

1. Recognition of Volatility and Risks:

- **Price Fluctuations:**
The value of \$JACKAL can fluctuate significantly over short periods of time due to factors such as:
 - General market conditions.
 - Trading volume.
 - Global events impacting the blockchain industry.
- **Risk of Loss:**
Investing in cryptocurrencies may result in partial or total loss of the invested capital. We recommend that participants only invest amounts that they are willing to lose.
- **External Factors:**
The project may be impacted by regulatory changes, technological advances or competition in the digital privacy market.

2. Transparency About Challenges:

- **Development Challenges:**
Despite the team's experience, the development of **Jackal Terminal** and the execution of all roadmap milestones may face unforeseen challenges, including technical delays.
- **Adapting to Market Changes:**
The cryptocurrency industry is constantly evolving, and adjustments to strategy may be necessary to ensure long-term viability.
- **Security:**
Although JACKAL and Jackal Terminal are designed with the highest security standards, the blockchain industry is subject to threats from hacking and vulnerability exploitation.

Ethical Commitment

Jackal Coin (\$JACKAL) has a clear commitment to ethics and transparency, reflecting its core values of privacy, decentralization, and trust.

1. Position Against Pump and Dump Schemes:

- The project is vehemently against market manipulation schemes such as **pump and dump** (the practice of artificially inflating the price of a token to attract investors and then selling en masse).
- All relevant ecosystem transactions will be publicly recorded on the blockchain, ensuring that JACKAL maintains a transparent and integral operation.
- We encourage community members to report any suspicious behavior that could harm the credibility of the project.

2. Sustainability and Community:

- The team is committed to a **sustainable growth strategy**, prioritizing ecosystem development and community support.
- Strategic decisions such as token burns, airdrop allocations, and use of reserves will be made with full transparency and based on the long-term interest of the project.

Message to the Community

The cryptocurrency market is exciting but also challenging. We recommend that all investors:

1. **Do your own research** before making financial decisions.
2. **Understand the risks involved** and invest responsibly.
3. **Actively participate in the community** to stay informed about the project's progress and actions.

Jackal Coin is more than just a memecoin – it's a vision for a more private, secure, and decentralized future. As we navigate the opportunities and challenges of the crypto market, our commitment to ethics, transparency, and our community will be the foundation for the project's success.

12. Frequently Asked Questions (FAQ)

When can I trade Jackal Coin?

After Phase 3 concludes and liquidity is added on PancakeSwap.

What happens to unsold tokens in a phase?

They are rolled forward to the next phase. No burn occurs.

Is the token audited?

Yes — an audit is planned between the testnet and final launch.

How is liquidity secured?

Via DxLock with a 12-month lock.

Can the owner change settings later?

Yes, initially but can permanently disable all admin functions later.

13. Conclusion

Jackal Coin (\$JACKAL) is more than just a token – it's a **collective mission** to redefine communication with privacy and security in the digital world. Combining technological innovation and a vision of freedom, JACKAL underpins the development of the **Jackal Terminal**, a device that promises to transform the way we communicate, ensuring total anonymity and protection.

We believe in transparency, decentralization, and long-term impact.

Our value proposition is clear: to offer a unique solution to digital privacy challenges while building a sustainable and engaged ecosystem. **Jackal Coin** unites a global community that shares the desire for a more secure, transparent and decentralized future.

Now, we invite you to **join this journey**. Whether as a holder, an active community member, or a user of **Jackal Terminal**, you will have the opportunity to shape an ecosystem that puts privacy first. Together, we can create something truly innovative – a project that inspires trust, delivers real value, and empowers individuals around the world.

Join us and be a part of the **Jackal Coin movement**. The future of digital privacy starts now, and you can be a pioneer in this revolution.

Let the Jackal lead.
